why should you come....

Find out how the latest software and services can reduce overheads and improve efficiencies.

document scanning | free your space

Reduce wasted office space. Cleardata uses Kodak technology and provides 200% quality checking. Scanning 24 million images per year.

document storage | secure, fast, managed

Protect your documents, cleardata has the latest fire protection and security. Files can be retrieved, scanned & returned quickly.

intelligent data capture | reduce data entry

Reduce costs & intensive data entry. Automatically capture and digitise forms, from handwritten to tick box or bubble entry.

online document hosting | flexible access

Document management, from as little as £10 per day, any type of file or image stored. Flexible, secure access from anywhere, using a web browser.

invoice processing software | 75% savings

It can cost up to £20 to manually process an invoice. Try out the latest automated processing software.

pda | live capture, tracking, task allocation

Try pda technology, a paperless system with live updates for remote workers.
